

Lab Exercise 1: GitHub Account Setup and Basic Git Workflow

Lab Title: GitHub Account Setup, Repository Management, and Pushing Code

Objective:

- Create a GitHub account using the university email ID (@juetguna.in).
- Create and manage a repository named OSSLab2025.
- Clone the repository locally.
- Modify README.md and push the change.
- Solve a coding problem and push it inside a folder LE1.

Part A: Create GitHub Account

1. Go to <https://github.com/>.
2. Click on "Sign up".
3. Use your JUET email ID (e.g., yourname@juetguna.in) to register.
4. Choose a username and password.
5. Verify your email through the link sent to your @juetguna.in inbox.

Important: Use an academic username (e.g., 221B124), avoid nicknames or informal names.

Part B: Create a New Repository

1. After login, click on the + icon (top-right) → "New repository".
2. Repository name:
OSSLab2025
3. Description:
This repository contains lab exercises for the Open Source Software Lab - 2025
4. Check: Initialize this repository with a README.
5. Click Create repository.

Part C: Clone Repository Locally

1. Open Git Bash or Terminal.
2. Navigate to your working directory:

3. Clone the repository using HTTPS:

```
git clone https://github.com/YOUR-USERNAME/OSSLab2025.git
```

4. Move into the cloned repo: `cd OSSLab2025`

Part D: Edit the README

1. Open the README.md file in any text editor.
2. Add the following:

```
## Lab Exercise 1
```

```
Name: Your Full Name
```

```
Roll Number: XXXXXXXX
```

```
Email: yourname@juetguna.in
```

```
<Solution code to part F>
```

3. Save and close the file.

Part E: Stage, Commit, and Push

Run the following commands:

```
git status
```

```
git add README.md
```

```
git commit -m "Added name and roll number to README"
```

```
git push origin main
```

Part F: Solve a Simple Coding Problem

Create a folder named "LE1". Solve one of the following two programming problem to add two numbers in python or find the greater of two numbers in java in a file named "sum_of_two_numbers.py" or "GTN.java".

Stage, commit, and push the file:

```
git add LE1/sum_of_two_numbers.py
```

```
git commit -m "Added solution to Lab Exercise 1"
```

```
git push origin main
```

Deliverables:

- GitHub profile created with @juetguna.in email.
- Public repo OSSLab2025 visible.
- README.md updated with student info.

- Folder LE1/ containing sum_of_two_numbers.py or GTN.java in GitHub repo.
